

4 s Holm p · ICA · 16 features (Dataset A + Dataset B)

Rows 1–2 (above the line) are confirmatory. Orange = Holm < 0.05. Dataset A medians the 37 retained 4 s tiles nearest visual onset. Dataset B is onset-locked post–pre versus matched no-ad. Holm is within feature across the 3 (A) or 4 (B) contrasts, not across the 16 features. n=18.
