

EEG Data Processing and Analysis Pipeline

Laboratory EEG arm

1 Ingestion / Landing: collect recordings and experiment logs

EEG recording

32 channel EEG · markers

Experiment log

source clock events

Link files to participant

participant ↔ experiment ↔ XDF

LAND

2 Bronze: preserve and verify raw files

Raw XDF + logs

Verify file integrity

Link XDF to log

Audit raw markers

DERIVE

3 Silver: align event timing and clean EEG

Align event clocks

Create event timeline

Estimate missing times

Event timing valid?

NO

YES

Convert XDF to MNE

Filter + rereference

Flag EEG artifacts

Signal usable?

NO

YES

4 Gold: create analysis ready EEG features

Condition windows

Ad timing reliable?

YES

Build ad windows

NO

Condition only

EEG feature table

5 Analysis: compare conditions and report findings

Compare conditions

Results and figures
